

Safety Scenarios:

Instructions: Please read each of the scenarios below. After reading each one, choose one. Using one of the applications discussed in class, recreate the scenario, explain what happens next, and provide a solution.

1. You see someone hurrying to get a job done. He is climbing a ladder and carrying his tools in one hand so he can't maintain three points of contact on the ladder. He needs a belt or a bag but doesn't have one.
2. It is your night to cook for your family, so you decide to cook spaghetti with meatballs. While frying the hamburger meat, the stove is turned up to high. The grease eventually bursts into flame. You grab a Class A fire extinguisher to put out the fire.
3. You and your partner are in science class and are doing an experiment which involves mixing chemicals. Two other students grab the wrong chemicals and when they start mixing, a chemical fire is started.
